THE INDUSTRIAL ONE.

- ✓ Industrial 4P Alternator
- ✓ GC800 Controller
- ✓ Battery Charger

All the kit you need.
All in one place. All in one box.

The power package designed for industry. Mecc Alte's Industrial ONE delivers a comprehensive power component kit manufactured for maximum reliability in demanding industrial environments. Built around our proven, and most popular, ECP34 alternator series, this integrated kit brings together perfectly matched components that ensure seamless operation across diverse applications such as manufacturing, telecommunications, and health-care.

The Industrial ONE combines Mecc Alte's robust ECP34 alternator with the GC800, the advanced paralleling genset controller and a high-performance battery charger - all engineered to work together as a unified system. This thoughtful integration eliminates compatibility concerns and streamlines installation, making sourcing easy, and servicing simple, to reduce maintenance time and costs.

The Industrial ONE components feature Mecc Alte's Smartech technology, allowing secure communication through CANbus protocols and remote monitoring capabilities. This connectivity enables real-time performance data, predictive maintenance insights, and remote troubleshooting—keeping your industrial operations running smoothly even when you're away from site.
